Session Description

Ever since the Internet came along language learning has become more fun. Online games and interactive tools allow millennials to learn a foreign language in a way they are often most accustomed to - on a screen! Digital gaming environments have also become increasingly used for purposes that are not commonly associated with recreation and entertainment. These 'serious games' create experiences intended to raise awareness of, and critical thinking about, humanitarian, ecological, and societal issues. Join this session to become familiar with digital games and simulations that can improve your Spanish fluency while simultaneously learn about real-world impact topics.

Web-based games

- **3rd World Farmer** @ <http://bit.ly/3rdworldfarmer> (select 'Spanish')
